## **Certified Peer Support Specialist Services**

County of San Diego Behavioral Health Services (BHS) supports the implementation of peer support services as a **new benefit** within BHS programs and envisions optimization of the Certified Peer Support Specialist role across all levels of service. Program staff members that have been identified for positions that <u>require</u> behavioral health lived experience must be trained and certified per the process defined on the <u>CalMHSA</u> website. Programs may hire individuals working toward peer certification within 90 days of hire. COR approval is needed for situations that the timeline cannot be met by a peer.
